Introduction to Creating Online Memorials

Online memorials are websites dedicated to the remembrance of your deceased loved ones. They last longer than newspaper notices and social media posts, they can be visited and viewed by other people. People create them to celebrate the life of a person that passed away and make information about this person available to others e.g. friends, families spread around the world or future generations. Today you will learn how to search through and create an online memorial page, and how to write an online 'in memoriam' notice. One of the websites that provide such services is BMDnotices.com which will be used for the purpose of this exercise. BMDnotices.com is a free service available to users worldwide.

NOTE: This class is only for presentation purposes. Please DO NOT click on 'SUBMIT' buttons during the class. You are welcome to create real Pages at a later stage, once you familiarize yourself with the website. Feel free to contact BMDnotices.com through their Contact page, should you need assistance creating real Pages.
